NukeWorker's History

NukeWorker.com's origins can be traced back to a 1997 single web page of nuclear links on a website named Rennhack.net, created by Michael Rennhack. Due to overwhelming interest in that content, NukeWorker.com was born in 1999 with a simple mission: Enhance nuclear workers lives. We accomplish this goal by providing nuclear employers the most cost effective method for recruiting nuclear workers. We supply the industry's easiest job management system with fanatical support, the most qualified applicants, and at the most competitive price.

NukeWorker.com has a loyal following of more than 90,000 registered active and passive job seekers that visit NukeWorker every day. NukeWorker receives 27 million hits per month, due to our excellent reputation and long-standing commitment to welcome all nuclear disciplines into our family. This popularity is due to NukeWorker's 'sticky' features, such as the 158,000 messages in the message board, the free practice quizzes and study guides, the photo gallery with pictures of every nuclear facility on the planet, and a facility info section that has every piece of information on any nuclear facility assembled into one massive database.

In addition to having the only nuclear resume database, NukeWorker has been the only supplier of accurate and complete US nuclear plant refueling outage schedules since 2002. Some of our prominent clients include the NRC (Nuclear Regulatory Commission), NEI (Nuclear Energy Institute), ABB, AREVA, Day & Zimmerman, Dominion, Duke Energy, DTE Energy, Energy Solutions, General Electric, Hydro-Quebec, Progress Energy, Shaw Group, Unitech, and Westinghouse.

In 2004 NukeWorker established a 'nuclear pride' store, to enhance pride in the nuclear industry. The pride store sells many gifts such as Zippo lighters, golf gear, clothing, bobble heads, and plush toys.

Online OSHA training such as the 8 & 40 Hour Hazwoper were added in 2006 due to popular demand.

Original NukeWorker Logo

NukeWorker's Founder

Michael D. Rennhack, Founder & CEO

Michael Rennhack founded NukeWorker.com April 18th, 1999 and has served as the President and Chief Executive Officer since its inception. Under his leadership, NukeWorker.com has experienced phenomenal growth, doubling gross income four out of five years and has become the nation's leading provider of nuclear job site services and the nuclear industry's most popular community website tripling the audience for 5 years straight, from 6,000 unique visitors per month in 1999 to 500,000 unique visitors per month in 2004. Mr. Rennhack has been a member of the

local and national Health Physics Societies since 1996. In 2000, Brookhaven National Lab honored Mr. Rennhack for his participation in their Ambassador Program for his work with the Boy Scouts, helping them earn their Atomic Energy Merit Badge. In 2008, Michael was appointed a Council Member of the East Tennessee Chapter of the Health Physics Society. In addition to founding NukeWorker.com, Mr. Rennhack has held radiological engineering, radiological management, and project management positions at more than 38 nuclear facilities around the country. He has also authored a popular Radiation Protection book.

Born February 14th, 1971 in Michigan to Jerry and Betty Rennhack, Michael's love of computers began at age 11 when he programmed his first electronic community (BBS). Michael was the youngest board member of the local computer users group at age 14, and at age 18 he began his nuclear career as a decontamination technician. In 1999, Michael merged his passion for computers and the nuclear industry with the creation of NukeWorker.com, the first website dedicated to enriching nuclear workers lives.

Michael met his wife Kathy in February, 2002 while working in Minnesota and proposed to her in September of that year while vacationing in Paris. They were married in June, 2003 in Jamaica and promptly moved to East Tennessee. In April of 2005 they were blessed with their daughter Lisa then again in February of 2009 with a son, Thomas. In August of 2008 the Rennhack's returned to Michael's home town in Southwest Michigan.

Job Posting & Resume Database

Job Board Features:

NukeWorker.com revolutionized both job-seeking and nuclear recruiting more than 10 years ago by addressing other sites' shortcomings. NukeWorker isn't just a job board, it's a **talent hub**. The talent hub is designed to attract nuclear workers with such features as forums for professional networking; features that teach career self-management principles, educational programs, conference schedules, and other information that will help NukeWorkers advance themselves in their profession, craft, or trade. Meanwhile, hiring decision-makers rejoice over the vast number of resumes from qualified candidates. Experts agree niche, industry-specific job boards like NukeWorker.com are most effective.

- **Powerful search capabilities** let employers find candidates quickly.
- **Manage job applications** – View, save, download, print, and email job applications/resumes. Reply online to job seekers with canned messages, or even ban job seekers. Track which applications you have accepted.
- **Manage job postings** – View currently open or archived jobs. Renew or delete jobs, use old posting as templates for new job postings.
- **Bulk job posting** and management – If you use a service to push your jobs out to other job sites automatically, that service is available on NukeWorker.com
- **Multiple sub accounts** under a master employer account that uses the master account credits, but has their own login ID, and can manage their own job postings and job applications.
- **A single click** allows candidates to quickly and easily apply for jobs on our site, or yours.
- **Company profile** and logo are free and can be modified at any time.
- **Quick Statistics** allows you to see how many times a job has been viewed and applied to.
- **Automatically notifies** candidates of new job postings that fit their interests and lets employers know when candidates have applied for jobs. Employers can get notifications when new resumes are posted that match their criteria.
- **Privacy** features for employers and Job seekers.
- **Instant Access** – Pay online for instant access, or pay by check. Invoices are instantly available online and can be printed.

Job Posting & Resume Prices as of 12/06/12

Package type	Resumes	Jobs	Price
Single Job Post		1	\$255
5 Pack of Jobs		5	\$950
10 Pack of Jobs		10	\$1,750
3 Months Unlimited Access	Unlimited	Unlimited	\$1,600
6 Months Unlimited Access	Unlimited	Unlimited	\$2,600
12 Months Unlimited Access	Unlimited	Unlimited	\$3,800
10 Pack of Resumes	10		\$125
1 Month Unlimited Resume Views	Unlimited		\$600

Degree, experience & security statistics:

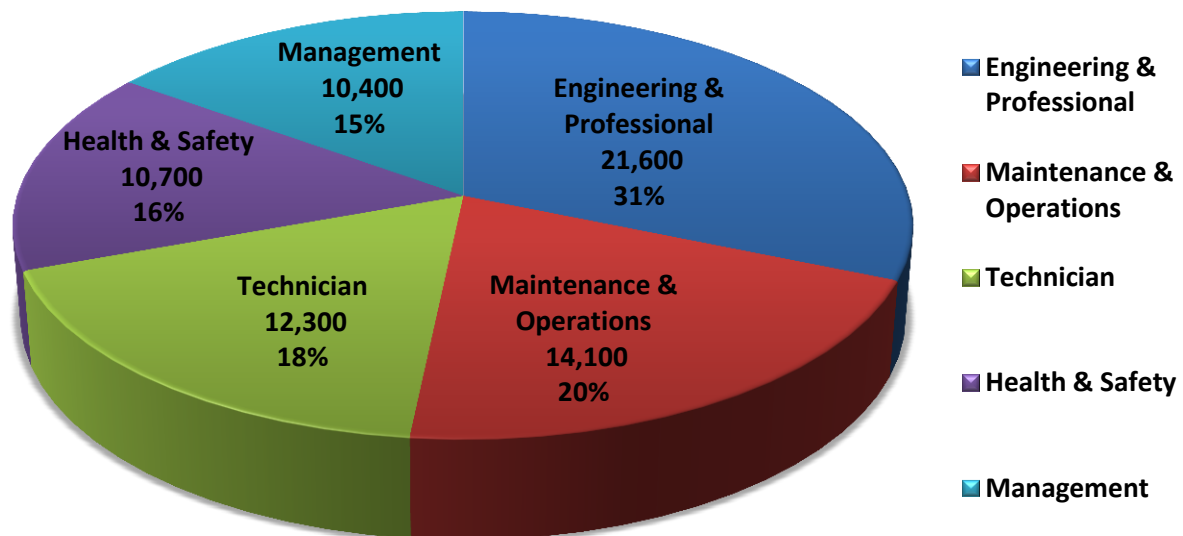

- 60% of the NukeWorker candidates have a degree AND over five years of experience.
- 25% have more than twenty years' experience
- 80% possess a security clearance

Job posting and resumes database statistics:

- Over 25,000 job applications were processed in 2012, 98,000 since 2005.
- More than 8,000 jobs were posted in 2009, > 14,000 since 2005.
- NukeWorker has over 28,000 fresh resumes in its database spanning 500 categories.
- Over 300-600 new resumes are added each month, 4,400-7,300 new resumes each year.

Don't Just Take Our Word For It Hear What Our Customers Have to Say!

NukeWorker has been matching employers with qualified and experienced nuclear workers since the 90's. It has the largest, easily searchable, database of nuclear resumes, growing by more than 600 new resumes every month. NukeWorker ranks #1 in search engines for 'nuclear jobs', with more than 16 million hits and 350,000 visitors each month.

We post every position on NukeWorker and hire several per month from the board. The individuals NukeWorker provide are excellent applicants with nuclear experience. One of the best features is the key word search with highlighted results; it's easy to scan to see if they are a potential candidate. We chose NukeWorker because it is a job site everyone in our industry is familiar with.

NukeWorker has provided us with a great volume of qualified applicants for our positions. The top notch selection has resulted in a number of interviews. We are delighted with the results of the NukeWorker.com site and would gladly recommend it to others in the nuclear industry.

We dislike old resumes that are recycled; NukeWorker has the only fresh nuclear resume database out there. We found senior workers who wouldn't be caught dead on other web sites.

NukeWorker is **THE** resource for filling jobs in the nuclear industry. We used NukeWorker to post a RP Tech vacancy; we received excellent results with over 40 applicants, viewed over 800 times in just a few days. We feel NukeWorker is definitely more effective than any other source. We also posted the vacancy on other web sites and received only 7 applicants in a month.

Running expensive ads on other sites generated too many applications from unqualified candidates, wasting our time and resources. NukeWorker provides our small business with a very extensive database of qualified resumes. We usually have to promptly remove job postings from NukeWorker due to overwhelming response from qualified candidates.

In our experience, posting on NukeWorker has been much more effective than posting in the local paper or any other job boards. NukeWorker has produced numerous serious inquiries from people with industry-specific experience. With NukeWorker, it is very simple to post a job; even previous expired postings are saved and can be reused.

NukeWorker's responsiveness to questions and customer service is stellar. When asked for help with postings, their staff went out of the way to help with the customized settings. No other company responded the way NukeWorker did when asked for help. NukeWorker is fast and easy to use, has current resumes, qualified candidates, useful screening criteria, and an abundance of responses to posted jobs.

We have been pleasantly surprised by the breadth and depth of the candidates we've found on NukeWorker. We can search across several nuclear disciplines by using a combination of keywords and pre-determined search criteria, and NukeWorker's resume search helps us zero in on the top talent with the qualifications we are looking for in a matter of minutes.

With NukeWorker, we always find the person we need and there is no lag time, unlike classified ads in the Newspaper. We especially love all the position listing tools (location, wage, per Diem, etc). They work fantastic. We also like that we can give specific instructions on how to submit a resume.
