## Don't Just Take Our Word For It Hear What Our Customers Have to Say!

NukeWorker has been matching employers with qualified and experienced nuclear workers since the 90's. It has the largest, easily searchable, database of nuclear resumes, growing by more than 600 new resumes every month. NukeWorker ranks #1 in search engines for 'nuclear jobs', with more than 16 million hits and 350,000 visitors each month.

We post every position on NukeWorker and hire several per month from the board. The individuals NukeWorker provide are excellent applicants with nuclear experience. One of the best features is the key word search with highlighted results; it's easy to scan to see if they are a potential candidate. We chose NukeWorker because it is a job site everyone in our industry is familiar with.

NukeWorker has provided us with a great volume of qualified applicants for our positions. The top notch selection has resulted in a number of interviews. We are delighted with the results of the NukeWorker.com site and would gladly recommend it to others in the nuclear industry.

We dislike old resumes that are recycled; NukeWorker has the only fresh nuclear resume database out there. We found senior workers who wouldn't be caught dead on other web sites.

NukeWorker is **THE** resource for filling jobs in the nuclear industry. We used NukeWorker to post a RP Tech vacancy; we received excellent results with over 40 applicants, viewed over 800 times in just a few days. We feel NukeWorker is definitely more effective than any other source. We also posted the vacancy on other web sites and received only 7 applicants in a month.

Running expensive ads on other sites generated too many applications from unqualified candidates, wasting our time and resources. NukeWorker provides our small business with a very extensive database of qualified resumes. We usually have to promptly remove job postings from NukeWorker due to overwhelming response from qualified candidates.

In our experience, posting on NukeWorker has been much more effective than posting in the local paper or any other job boards. NukeWorker has produced numerous serious inquiries from people with industry-specific experience. With NukeWorker, it is very simple to post a job; even previous expired postings are saved and can be reused.

NukeWorker's responsiveness to questions and customer service is stellar. When asked for help with postings, their staff went out of the way to help with the customized settings. No other company responded the way NukeWorker did when asked for help. NukeWorker is fast and easy to use, has current resumes, qualified candidates, useful screening criteria, and an abundance of responses to posted jobs.

We have been pleasantly surprised by the breadth and depth of the candidates we've found on NukeWorker. We can search across several nuclear disciplines by using a combination of keywords and pre-determined search criteria, and NukeWorker's resume search helps us zero in on the top talent with the qualifications we are looking for in a matter of minutes.

With NukeWorker, we always find the person we need and there is no lag time, unlike classified ads in the Newspaper. We especially love all the position listing tools (location, wage, per Diem, etc). They work fantastic. We also like that we can give specific instructions on how to submit a resume.
